A DIGITAL DEFENSE CIRCLE FOR COMMUNITY
ORGANIZERS, CARE WORKERS, EDUCATORS, AND
ANYONE NAVIGATING HYPER SURVEILLANCE.

lemme talk my shit rq

[home](#)[about](#)[content](#)[others](#)

I'M IMANI. I GOT INTO BIOETHICS, CYBERSECURITY AND DATA PRIVACY SPECIFICALLY TO ROB TECH BROS OF THEIR PEACE. I'VE DONE THIS WORK IN MEDICAL SOFTWARE DEV, LEGAL ENGINEERING, TECH POLICY, REPRODUCTIVE JUSTICE, AND EDUCATION - THE COMMON THREAD LINKING MY EXPERIENCE HAS BEEN AN UNDERSTANDING THAT DATA PRIVACY SHOULD NOT BE TREATED AS THIS INACCESSIBLE, GATEKEPT, INDIVIDUALISTIC THING, BUT RATHER SOMETHING INTEGRAL TO COMMUNITY BUILDING AND CARE.

I DON'T HAVE A HEADSHOT SO HERE IS A PHOTO OF ME IN AWE AT A LESBIAN BURLESQUE SHOW THAT I FOUND WHILE DOING A DIGITAL FOOTPRINT AUDIT ON MYSELF.

threat modeling & risk assessment

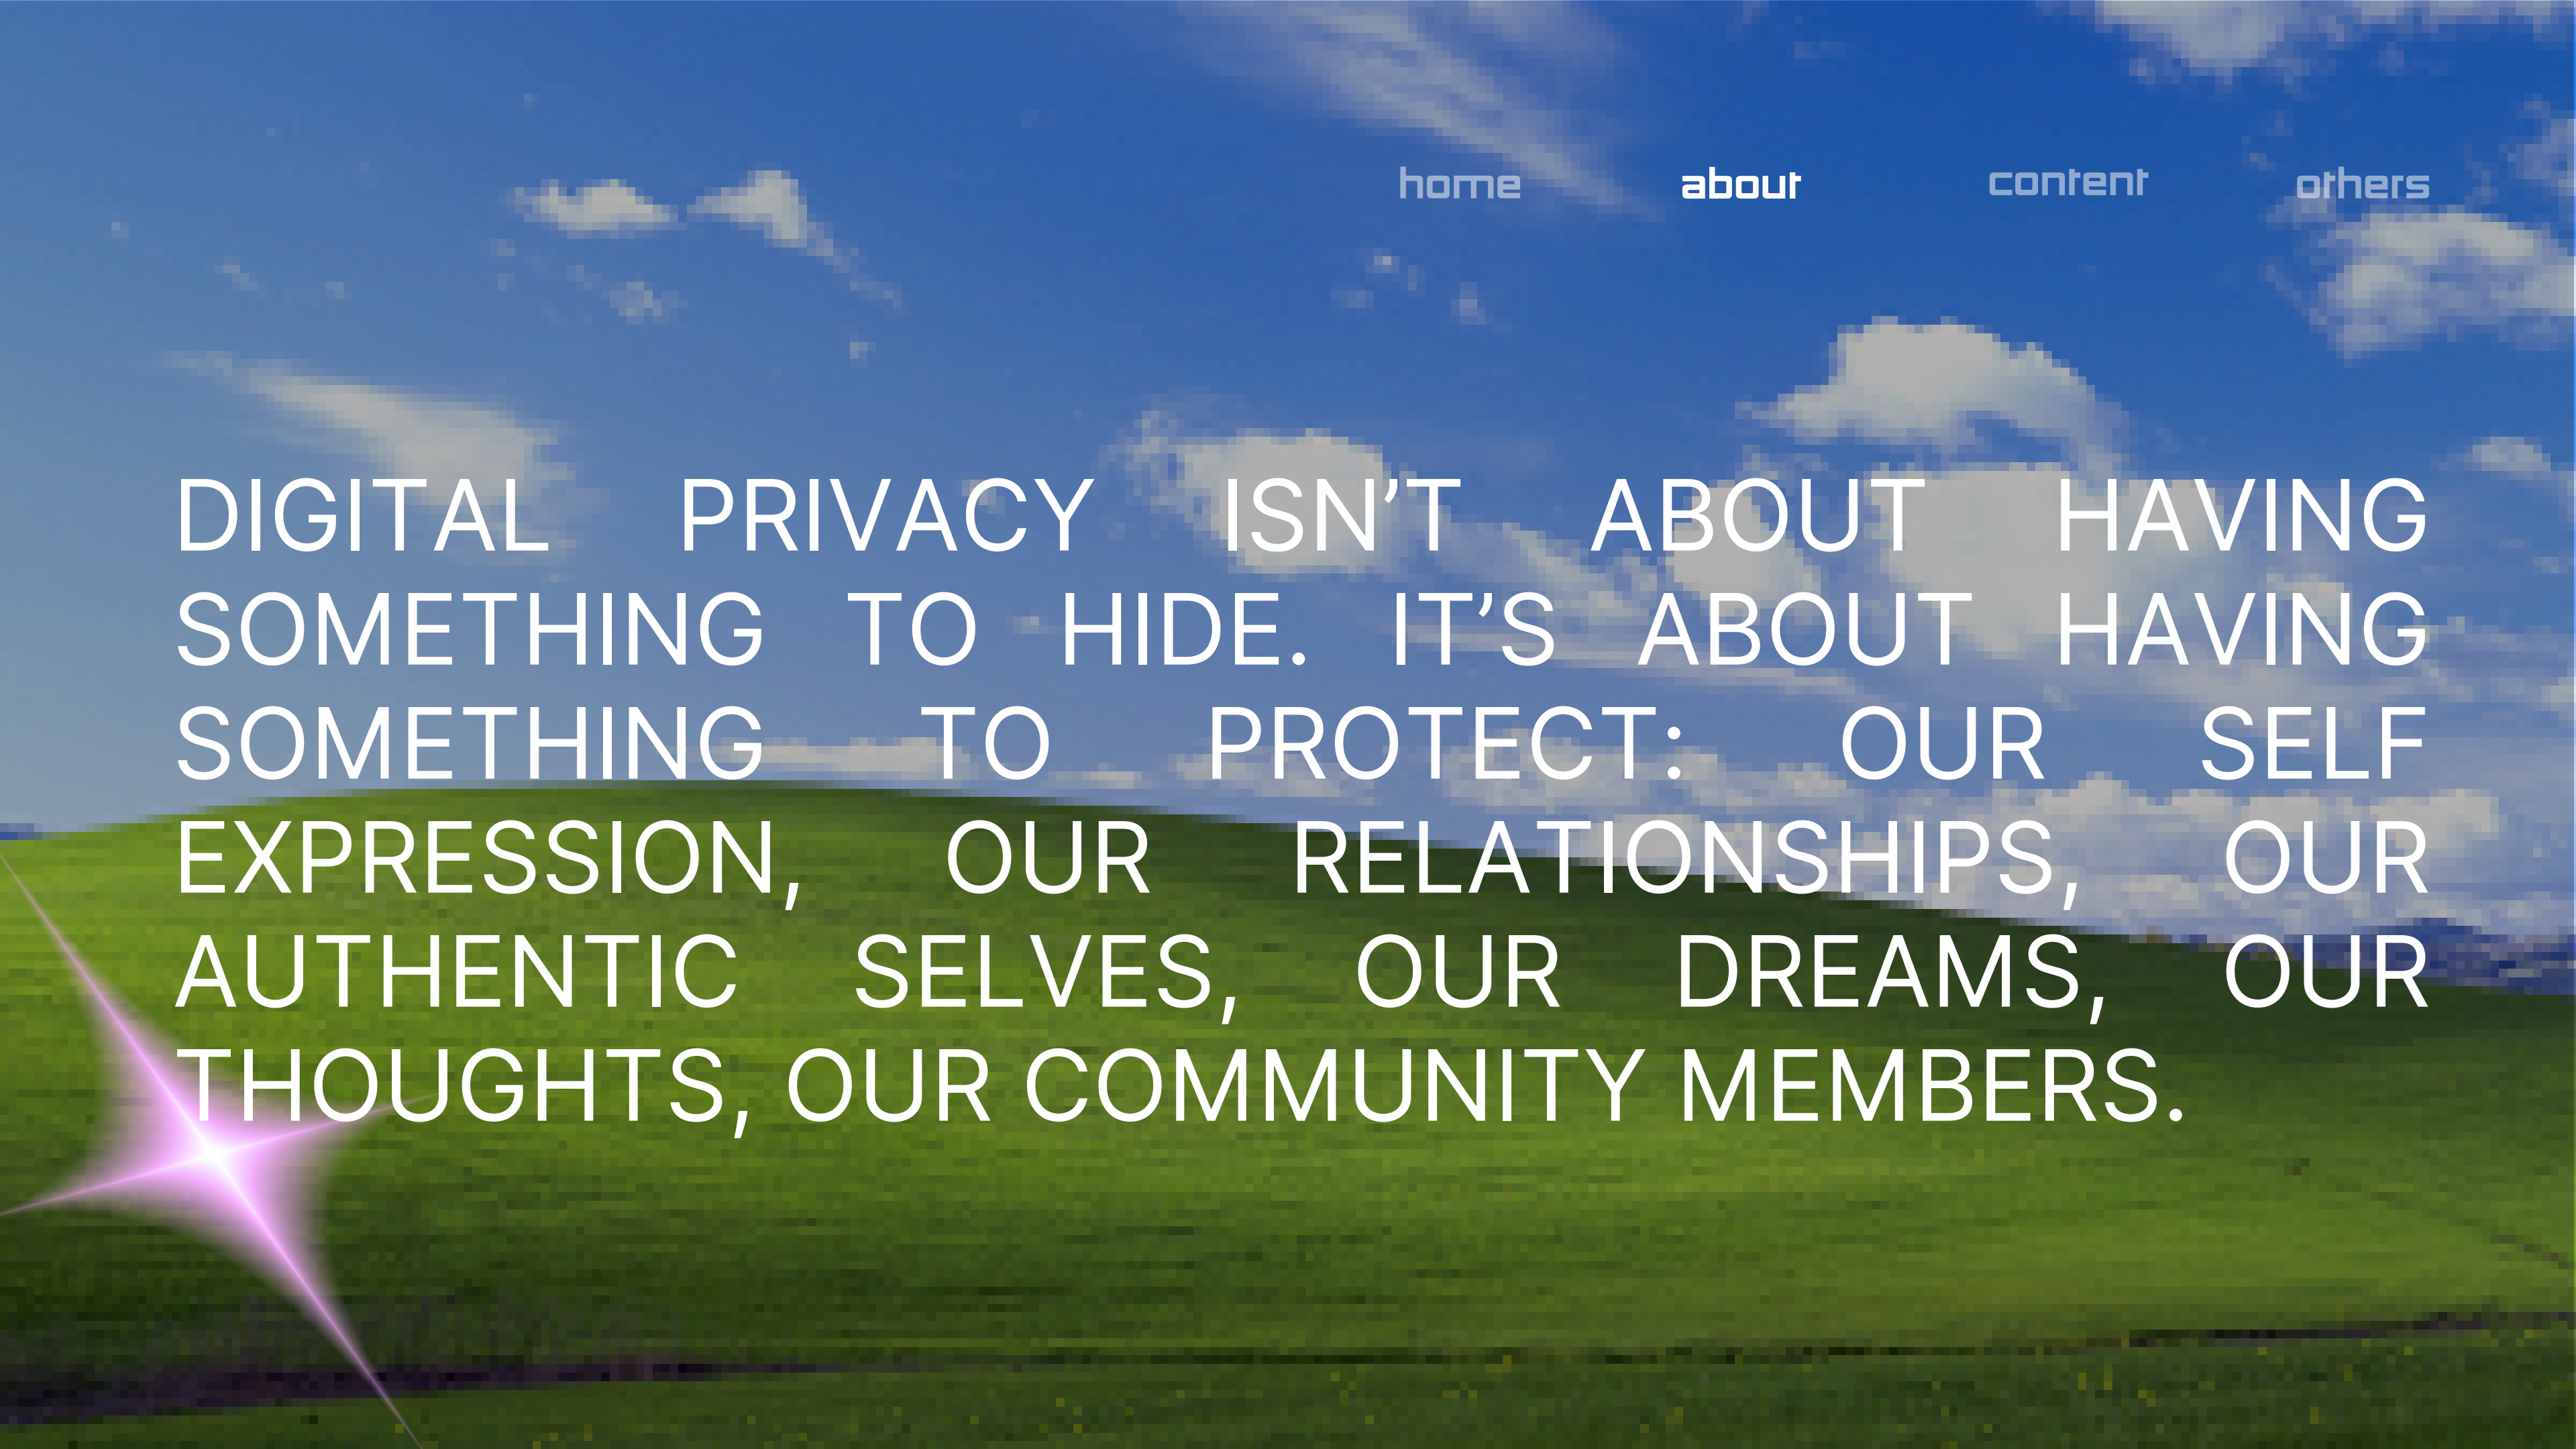

- Know how to assess how much protection is needed in different contexts and for different individuals

security culture

- Understand what security culture is and how to apply this knowledge

share information

- Share with each other and create artifacts to share in community

[home](#)[about](#)[content](#)[others](#)

DIGITAL PRIVACY ISN'T ABOUT HAVING
SOMETHING TO HIDE. IT'S ABOUT HAVING
SOMETHING TO PROTECT: OUR SELF
EXPRESSION, OUR RELATIONSHIPS, OUR
AUTHENTIC SELVES, OUR DREAMS, OUR
THOUGHTS, OUR COMMUNITY MEMBERS.

jargon warning

[home](#)[about](#)[content](#)[others](#)

personal/sensitive information/pii

- any information that can be used to identify and/or harm you

opsec/persec

- operational security/personal security

security culture

- keeping things on a need-to-know basis regarding sensitive information as an act of community care

what do you want to protect?

[about](#)

[content](#)

[others](#)

low risk scenarios

low risk

[home](#)[about](#)[content](#)[others](#)

Benefits

Limitations

Use Cases

Level 1

Basic Device
Security Settings

- Protects against casual snooping
- Prevents easy data theft if device gets lost
- Maintains usability of device
- Free to implement
- Minimal technical knowledge required

- Still generates metadata
- Location can still be tracked
- Vulnerable to legal demands
- Not effective against targeted surveillance
- Apps may still collect significant data

- Daily professional use for social workers, educators, mental health providers
- Regular commuting/transit in NYC
- Low-sensitivity client meetings
- Regular medical appointments as a patient
- Community education events

Level 1.5

Airplane
Mode/DND

- Control over when device is actively connecting
- Device still available for offline uses
- Selective connectivity

- Must remember to enable airplane mode
- Device still physically present and trackable
- Some services won't work as expected
- May miss important communications

[home](#)

[about](#)

[content](#)

[others](#)

medium risk scenarios

med risk

[home](#)[about](#)[content](#)[others](#)

Benefits

Limitations

Use Cases

Level 2

Privacy-Focused App &
Settings Audit

- Enhanced communication privacy
- Reduced digital footprint

- Security depends on proper configuration
- Developers lie.

- Therapy sessions (provider or client)
- Support group meetings
- Sensitive one-on-one consultations
- Gender-affirming care appointments
- Reproductive healthcare visits
- Initial organizing conversations
- Documentation of sensitive events

Level 2.5

Faraday Bags

- Blocks all wireless signals
- Device remains physically accessible in case you need to document something or communicate at a later time
- Protection from remote activation

- Cannot receive calls/messages while sealed
- **Must be properly sealed and regularly tested for effectiveness**
- Adds bulk to carried items
- **Does not prevent physical access if confiscated**

- Legal consultations with vulnerable clients
- Political organizing meetings where device needed but privacy essential
- Transport of sensitive documentation
- High-risk medical appointments

[home](#)

[about](#)

[content](#)

[others](#)

high risk scenarios

high risk

[home](#)[about](#)[content](#)[others](#)

Benefits

Limitations

Use Cases

Level 3

Temporary
Device
Separation

- Hinders digital surveillance via personal devices
- Significantly hinders location tracking
- Protection from audio/video recording via malware or compromised devices
- No risk of remote activation

- No access to device functions
- No emergency communications
- Must plan ahead
- Creates potential security gap elsewhere
- Difficult to document situations that might need evidentiary support

- Critical therapy sessions with highly sensitive disclosures
- Small organizing meetings discussing future actions
- Private community support sessions for vulnerable groups
- Immigration consultations with undocumented individuals
- Initial legal strategy meetings

Level 4

Multiple
Designated
Phones/Buying
Burners

- Can create distance between activity and personal identity
- Limited data if seized/compromised
- Disposable if necessary
- Can be purchased somewhat anonymously
- Limited historical data or connections

- Additional cost Requires operational security knowledge to fully serve its purpose
- Limited functionality
- Still creates location data while active
- Still subject to confiscation at borders
- **Truly traceless burners aren't really a thing anymore**

- Protest participation as legal support/jail support/protest monitor
- Coordinating community responses
 - to ICE raids
- Documenting law enforcement misconduct
- Abortion support work
- Harm reduction outreach
- Border crossing
- When minimal communication needed
- Short-term high-risk periods

- Coordinating community responses
 - to ICE raids
- Documenting law enforcement misconduct
- Abortion support work
- Harm reduction outreach
- Border crossing
- When minimal communication needed
- Short-term high-risk periods

Level 5

No Personal
Devices

- Increased digital anonymity
- Lower risk of surveillance/tracking
- Full protection from compromised devices
- Makes up for security mistakes/gaps in other layers of protection

- No access to digital tools/resources
- No emergency communications
- Coordination challenges
- Highly restrictive

- Direct action participation
- High-stakes legal defense meetings
- Critical organizing of sensitive events
- Situations with legal jeopardy
- Counter-surveillance operations
- Supporting undocumented individuals during enforcement actions

Attention

Require Attention for Face ID

TrueDepth camera provides an additional level of security by verifying that you're looking at iPhone before authenticating. Attention detection may not work with some sunglasses. Face ID will always require attention when you're wearing a mask.

Stolen Device Protection

Stolen Device Protection

This adds another layer of security to your iPhone in the event that it is stolen and someone knows your passcode. [Learn more...](#)

Require Security Delay

Away from Familiar Locations

Always

A delay will be required when you are not at a familiar location, such as your home or work, to change security settings.
